Default WissKI Distillery Adapter

Which adapter does this Pathbuilder belong to?

Import Templates

Pathbuilder Definition Import

Path to a pathbuilder definition file.

Set default mode to

Keep settings from import file

What should the fields and groups mode be set to?

- **Keep settings:** Paths and their field types, cardinality, activation status, and ids etc. are imported as in the import file.
- **Create:** Paths are imported and enabled, but field types, and path and field id generation are set to default behavior.
- **Do not create:** Paths are imported, but not enabled and their field types, and the path and field id generation are set to default.
