Name *

> NFDI4Objects Objektbiografie

Machine name:
nfdi4objects_objektbiografie

Name of the Pathbuilder-Tree.

Default WissKI Distillery Adapter

Which adapter does this Pathbuilder belong to?

Import Templates

Pathbuilder Definition Import

Path to a pathbuilder definition file.

Set default mode to

Keep settings from import file

What should the fields and groups mode be set to?

- **Keep settings**: Paths and their field types, cardinality, activation status, and ids etc. are imported as in the import file.
- **Create**: Paths are imported and enabled, but field types, and path and field id generation are set to default behavior.
- **Do not create**: Paths are imported, but not enabled and their field types, and the path and field id generation are set to default.

Import
